

Q-Pulse® training solutions

Course: Effective Asset Management

Building the foundations of a managed asset management system

Purpose of the service:

- The purpose of the asset module is to ensure the status of assets are fit for purpose

Benefits for your organization:

- You will have clear visibility of the status of all assets and the action required to maintain effectively in a structured and methodical manner

Benefits for you as an individual:

- You will be taught powerful techniques to effectively manage assets within your organization

You will learn how to:

- Ensure asset and activity owners are entered in the system and have access to suitable modules, e.g. asset, CA/PA and workload.
- Ensure the privileges associated with people allow them to carry out their role within the asset process
- Switch on/off relevant messages
- Populate relevant lists, e.g. activity types, item types, reason why unavailable, item location, activity outcome, etc.
- Set-up Wizards and Templates

Who this service is for:

- Quality/Compliance Managers
- Department Managers

Entry requirements:

- Current Q-Pulse user with valid support agreement
- Broadband internet connection verified by customer prior to training for web-ex training
